

**SIBERIAN FOREST PRODUCTS**  
**REGULAR AND PREVENTIVE MAINTENANCE**

- Maintain proper humidity conditions within your home. It is highly recommended that the humidity level stay in the recommended range (between 35% and 45% approximately) throughout the year. Problems related to humidity level variations can be minimized by proper ventilation, dehumidifying or heating.
- Regularly sweep, vacuum or dust mop the floor to prevent sand or abrasive dust from accumulating and scratching the finish.
- Remember that wood and water don't mix! Never wash your Siberian wood floors with lots of water and do not leave water or any other liquid to dry on your hardwood floor. Blot up spots and spills immediately.
- Be sure to keep pets' nails cleaned and trimmed as they could damage the finish of your hardwood floor.
- Although the Siberian finish is very durable and resistant, sharp and pointed objects can cause damage to your floor.
- Never use wax, household detergents or soap, as they will leave a greasy film on your wood floor. Use authorized maintenance products specially designed for the care of your floor. Always clean your wood floor lengthwise following wood grain. Use Polycare products (for polyurethane finish) available at your local flooring distributor and many local supermarkets and hardware stores.
- Avoid wearing high heels on your wood floor. Do not wear shoes that are covered with dirt, gravel or abrasive dust.
- Use adequate floor protection (felt pads) under all furniture and chair legs, in order to ease their movement and to prevent scratching the floor. Use protective mats at doorways.
- Protect the floor to move heavy pieces of furniture. Carry them or place them on a rug, wrong side up, and slide the rug.
